PROFESSIONAL SUMMARY

Highly adaptable Frontend and Systems Development Engineer with a proven track record of building scalable, responsive web applications and integrating advanced AI capabilities. Expert in leveraging React, Next.js, TypeScript, and Tailwind CSS alongside RESTful APIs and modern database systems to deliver high-performance, user-centric platforms. Adept at cross-platform development, AI prompt engineering, and CMS optimization. Combining an analytical mindset with a passion for clean code, component reusability, and flawless UI/UX consistency, I build digital experiences tailored for global and local markets.

CORE COMPETENCIES

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, TypeScript, Tailwind CSS, SASS, Zustand, React Router, Context API

AI & Prompt Engineering: ChatGPT API integration, Prompt Tuning/Optimization, Interaction Simulations

CMS & E-commerce: WordPress, WooCommerce, Elementor, Custom Plugin & Theme Development, Advanced Custom Fields (ACF)

Backend & Databases: Node.js, RESTful APIs, MySQL, MongoDB, Firebase, Supabase

Tools & DevOps: Git/GitHub, Figma, Postman, Swagger, Google Cloud Platform (GCP), Netlify, Slack

PROFESSIONAL EXPERIENCE

Oxymon Finance Solution

02/2026 – Present

Frontend Engineer • Remote

- Architect and maintain robust frontend application infrastructure, swiftly resolving network, UI, and API bottlenecks to guarantee maximum platform uptime.
- Design and deploy reusable, accessible UI components with strict input validation to fortify application security and eliminate runtime errors.
- Engineer and embed AI-driven solutions for dynamic user support pipelines and content generation automation.
- Implement Test-Driven Development (TDD) methodologies, directly enhancing codebase reliability, test coverage, and long-term maintainability.
- Provide clear technical documentation and cross-team support to streamline the internal adoption of newly deployed tools.

Avario Digitalis

08/2025 – Present

Web Developer / Technical Officer • Remote

- Develop, customize, and optimize bespoke WordPress themes and custom plugins utilizing Elementor and WooCommerce to meet diverse client requirements.
- Spearhead SEO strategies and performance engineering (caching strategies, asset optimization), driving a 40% growth in organic web traffic.
- Troubleshoot complex hardware, software, and IT infrastructure anomalies to ensure high-performance operations.
- Collaborate actively in cross-functional technical meetings, contributing key insights to improve organizational IT processes and agile delivery.

Side Hustle

11/2024 – 02/2025

Frontend Developer • Remote

- Built and optimized reusable React components utilizing advanced patterns like lazy loading and memoization, accelerating application performance by 30%.
- Integrated multi-vendor third-party APIs to automate critical user workflows and scale feature sets.
- Restructured the DOM hierarchy and minimized render-blocking assets to slash page load times by 20%.
- Conducted frontend QA testing and applied prompt engineering methodologies to simulate and refine complex user interaction models.

Zuri Team, Inc.

06/2024 – 09/2024

Frontend Developer • Remote

- Transformed complex Figma high-fidelity mockups into modular, pixel-perfect web interfaces, elevating mobile usability metrics by 20%.
- Refactored monolithic legacy codebases into highly decoupled, reusable components, significantly reducing technical debt.
- Ensured strict cross-browser compatibility and web accessibility, aligning all developed interfaces with WCAG compliance guidelines.
- Utilized Git/GitHub for robust version control, code reviews, and seamless issue tracking within an agile team ecosystem.

PROJECTS

Oxymon

Fintech & Digital Payments Platform

Tech Stack: React, Next.js, TypeScript, Tailwind CSS, RESTful APIs, Charts.js

- A modern finance platform that helps users save, borrow, and manage money with an intuitive interface and fair interest rates.
- Integrated secure financial endpoints and real-time data streaming architectures.
- Live Link: <https://oxymon.co/>

Regal Cravings

E-Commerce Food Delivery Application

Tech Stack: ReactJS, Context API, Tailwind CSS, Firebase

- Engineered a full-featured food ordering application complete with dynamic menus, state-managed shopping carts, and a streamlined checkout flow.
- Live Link: regal-cravings.netlify.app

EDUCATION

University of Ibadan

03/2015 – 04/2019

Bachelor of Science (B.Sc.) in Microbiology • Oyo State, Nigeria

- Key Research: Conducted comprehensive data analysis on the antibiotic susceptibility profiles of Escherichia coli strains isolated from municipal water sources.

VOLUNTEERING & LEADERSHIP

I Care For All Foundation

07/2023 – Present

Database Evaluator • Ikeja, Lagos, Nigeria

- Volunteer technical expertise to audit, structure, and optimize internal data tracking systems to improve the foundation's reporting accuracy and operational outreach.
